

# Hong Kong Physiotherapy Association 55<sup>th</sup> Anniversary Conference

## Post Conference Workshop 2

9<sup>th</sup> Oct 2018 (Tuesday) 18:30-21:30

Venue: T.B.C.

### Workshop Title:

## Intensive rehabilitation and use of the robotic exoskeletons with neurological conditions

### Speaker:

**Ms. Eva Sobonova**

Ms. Eva Sobonova graduated and holds a Master's degree from the University of Health Care and Rehabilitation in Slovakia. Besides teaching at the Health School of Physiotherapy in Banska Bystrica, she worked in the biggest spinal cord injury centre in Slovakia, where she gained her extensive neurological and musculoskeletal experience. She also worked in a few private physiotherapy centres in the UK. Currently Eva is the Head Physiotherapist at the Royal Buckinghamshire Hospital in Aylesbury. She combines hands on therapy with the latest rehabilitation technologies including all forms of Functional Electrical Stimulation, virtual reality treatment and all robotic exoskeletons. She actively contributes and presents her clinical outcomes in neurological conferences.

### Course Objectives:

- To appraise the use of the robotic exoskeleton technology for gait training in people with spinal cord injuries at levels C7 to L5 and other neurological conditions
- To provide opportunities for hands-on practice on the latest technology of robotic exoskeleton

**Registration Fee**  
**HKPA Member**  
**Non-HKPA Member**

**Early Bird**  
HK\$500  
HKD\$750

**On or after 13<sup>th</sup> August 2018**  
HKD\$700  
HKD\$950

*If you have any suitable SCI or Stroke patient, you could also invite them to join the workshop as well to try and experience the power of the robot!*
