The Mulligan Concept:
Lower Quarter course - Snag's, SMWLM, MWM's & PRP's - Nags, Snags,
MWM's and PRP's
23 & 24 July, 2011

Course Content and Course Outline

This exciting two day clinical workshop will present in depth the unique concept developed and refined by New Zealand physiotherapist Brian Mulligan. This concept will provide your clinical practice with a stimulating new dimension, giving you an extensive array of treatment options to manage your client list. All the latest techniques, including Nags, Snags, PRP's and MWM's for the lumbar spine and lower extremity will be covered in this fully comprehensive program. No previous experience of the Mulligan Concept is required to attend. Participants are given very close practical supervision to ensure high levels of competency and an understanding of technique application through clinical reasoning and patient demonstration.

Mr. Gorman Ngai focus in spinal and sport related rehabilitation clinically, and has special interests in manual therapy. Gorman has been assisted other senior teachers in teaching the Mulligan Concept courses both in Hong Kong and Australia since 2002, and become an accredited Mulligan Concept Teacher since 2006. He is a member of Mulligan Concepts Teacher Association, which is the only qualified organization in the world to teaching this excellent concept, so Gorman is very well qualified to teach this programme.
