EMPOWERING RECOVERY AND REDEFINING MOBILITY WITH WANDERCRAFT: From Clinic to Community Practical Applications of Exoskeletons for Physiotherapists

Lindsey Wynne is a board-certified neurologic physical therapist with more than a decade of experience in neurorehabilitation, specializing in spinal cord injury (SCI) care. She currently serves as the U.S. Clinical Specialist Manager for Wandercraft, supporting the implementation and clinical advancement of robotic mobility technologies across rehabilitation hospitals and clinics nationwide.

Lindsey Wynne
PT, DPT, NCS

Prior to joining Wandercraft, Lindsey spent almost a decade at Baylor Scott & White Institute for Rehabilitation in Dallas, Texas, including roles on the inpatient SCI rehabilitation team, co-chair for the SCI community support group, and as a research physical therapist assisting with federally funded clinical trials and dissemination efforts.

She has presented at multiple national conferences, including the American Spinal Injury Association, Academy of Spinal Cord Injury Professionals, and American Congress of Rehabilitation Medicine, sharing expertise in neurologic rehabilitation, SCI care, and emerging rehabilitation technologies.

Lindsey also serves as adjunct faculty within several Doctor of Physical Therapy programs in the U.S.

EMPOWERING RECOVERY AND REDEFINING MOBILITY WITH WANDERCRAFT: From Clinic to Community Practical Applications of Exoskeletons for Physiotherapists

Carolina Mauricio graduated from the Health School of Coimbra, Portugal, as a physical therapist specializing in neurological rehabilitation. Her clinical expertise has been shaped by her training at the Latvia National Rehabilitation Centre as well as the Portuguese Association for People with Neurological Disorders, followed by several years of clinical practice. She went on to establish her own private practice in Paris, where she continued to provide specialized care for individuals with neurological disorders.

Carolina Mauricio
PT

She currently serves as a Clinical Specialist at Wandercraft, supporting clinicians in integrating advanced robotic technology into their clinical practice. In this role, she combines clinical expertise with technical training, helping optimize patient outcomes and support innovation in neurorehabilitation.
